YOUR TRAINING SOLUTION

Business is changing.

Sophisticated tools are continually appearing, from desktop software to state-of-the-art networks.

Business and employees must keep pace with this change.

You need to train, motivate, and keep valued employees as part of your organisation.

Can you do this without spending a fortune? Absolutely!

Features

Bookmarking	Recognizes where you are throughout a course. Therefore, when you stop and exit a course, the bookmarking feature keeps you from losing any information - and from starting courses over from the beginning.
Skill Assessment	Save time by taking a pre-test before you take the course. The results of the test will let you know what parts of the course you need to take. A post-test is also available.
Exercises	Gain valuable hands-on experience working in the actual software application.
Questions	True/false, matching, and fill-in-the-blank questions are included throughout the courses, engaging you in the learning process.
Simulations	Gain hands-on experience with the use of task-based simulations. It may seem like you're in a different application, but you'll be safe within the bounds of the course.
Sample Files	Coding courses contain sample files that you can actually cut and paste into a compiler. You'll be able to practice with these files and save time by using them in a program of your own.
Click-to-Continues	Our click-to-continues will ensure that you'll be an active and engaged participant in the course.

Benefits

Just in Time - Use it when you need it. It's ready when you are.
Cost Effective - It's easy on your pocket. Where else can you get access to a large library of courses for pennies a day?
Small Bites - Make it a discipline and spend twenty minutes a day over a long period of time. You'll become a master in no time.
Reference - Use it as a valuable reference source. The index and table of contents feature allow you to look up what you need.
Control the Pace - Learn it quickly or take your time. You're always in control.
Focus on What You Need - Skip what you know or don't need. Or, take it twice. It's your choice.
Available 24 hours/day - 7 days/week - Learn before bed, first thing in the morning, right after lunch, or in the middle of the night. It's always available.
Anywhere, Anytime Access - All you need is an Internet browser and you can access the courses.
